Thanks Shaun. I may be overly sensitive but folks need to call unified command and not wait for meetings like this. That way we can bring science to the table. Thanks

Gina,

Regarding the blue/green water color, I heard your admonition to coordinate this through UAC and EOC and I certainly agree. I just got briefed on it last night, and it came up again at LaPlata County Commission this morning. I just wanted to raise on the call with you so others know it has come up as an issue. I will make sure we work through UAC in our response.

Shaun
